## **Stenting in STEMI: Does Size Matter? STENTYS® Self-Apposing™ Stent for STEMI and Complex Anatomy**

**EuroPCR Symposium, Thursday, 19th May, 12:00-13:30, Room 342AB**

**Chairmen: Prof. Patrick W. Serruys, M.D., Maurice Buchbinder, M.D.,**

PRINCETON, N.J., and PARIS, May 16, 2011 — **STENTYS S.A. ([STNT.PA](#))**, a medical technology company commercializing the world's first and only self-apposing stent to treat **Acute Myocardial Infarction (AMI)**, is hosting a key symposium at this week's EuroPCR congress. The symposium — “Does Size Matter? STENTYS® Self-Apposing™ Stent for STEMI and Complex Anatomy”—will be chaired by two internationally renowned cardiologists: Prof. Patrick W. Serruys, M.D. and Maurice Buchbinder, M.D. Registered participants of the EuroPCR congress are eligible to attend.

The STENTYS stent represents a major breakthrough when treating heart attacks: it is *self-apposing*, i.e. it “fits snugly” into the contour of a blood vessel, and its shape and diameter adapt to the anatomic changes of the coronary arteries during the post-AMI phase, avoiding a major complication of all other conventional stents: malapposition.

### **About STENTYS**

Based in Princeton, N.J., and Paris, STENTYS has developed a new generation of stents to treat acute myocardial infarction (AMI). Founded by **Jacques Séguin, M.D., Ph.D., (also founder of CoreValve, which was acquired by Medtronic)** and **Gonzague Issenmann**, STENTYS received CE-marking for its flagship products in 2010. Its *self-apposing* stent adapt to the anatomic changes of the arteries in the post-infarction phase and thus prevents the *malapposition* problem associated with conventional stents. STENTYS has commenced marketing activities in several European countries.
