

Revenues for the Third Quarter of 2017: Continued Growth for the Xposition S Stent

- Quarterly sales of the Xposition S stent up +19% in volume
- Third quarter revenues: €1.6 million (-4.7%)

PARIS - October 12, 2017 - 5.45 pm (CEST) – STENTYS (FR0010949404 – STNT), a medical technology company commercializing the Xposition S self-apposing coronary stent, today reports its revenues for the third quarter and first nine months of 2017.

Change in revenues

€ thousands	9 months			3 rd quarter		
	2017	2016	% change	2017	2016	% change
Revenues*	5,162.40	5,337.90	-3.2%	1,614.80	1,693.50	-4.7%

* Unaudited data

During the third quarter of 2017, STENTYS recorded revenues of €1.6 million, down 4.7% compared to the same period of 2016. This slight decrease is linked to the end of the commercialization of previous-generation stents (SES / PES), which could not be entirely offset despite a sound increase in sales of the Xposition S stent (+19% in volume and +4% in value). The self-apposing Sirolimus-eluting stent now accounts for 90% of the Company's total revenues, as of September 30, 2017.

Over the first nine months of 2017, sales totaled €5.2 million, down 3.2% compared to the first nine months of 2016.

Christophe Lottin, Chief Executive Officer of STENTYS, comments: *“During the third quarter, we have continued our efforts to rationalize our offer, which is now primarily based on our flagship product, the Xposition S stent. The continuous growth in sales since its launch confirms its added value compared to conventional stents. We are intensively working to accelerate its adoption in strategic countries through a specific training program devoted to new users, while pursuing its regulatory approval in new countries in order to stimulate our growth from 2018.”*

About STENTYS

STENTYS develops and commercializes innovative solutions for the treatment of patients with complex artery disease. STENTYS' Self-Apposing[®] drug-eluting stents are designed to adapt to vessels with ambiguous or fluctuating diameters in order to prevent the malapposition problems associated with conventional stents. The APPOSITION clinical trials for the treatment of acute myocardial infarction showed a very low mortality rate at one year and a faster arterial healing compared to conventional stents. The company's product portfolio also includes MiStent SES[®], a coronary DES whose new drug delivery mechanism is designed to match vessel response, and is marketed through STENTYS' commercial network in Europe, the Middle East, Asia and Latin America.
