STENTYS appoints Michel Darnaud to its Board of Directors

PRINCETON, N.J., and PARIS, Nov. 23, 2010—STENTYS (STNT.PA), a medical technology company that markets a new generation of innovative stents to treat Acute Myocardial Infarction (AMI), announced today that its board of directors has nominated Michel Darnaud as a director.

“Michel Darnaud has immense experience at building and growing international medical device companies, particularly in the interventional cardiology sector. We look forward to his contributions to the STENTYS board, which we believe will be considerable,” said Jacques Séguin, M.D., Ph.D., co-founder and chairman of STENTYS.

Mr. Darnaud is a seasoned executive with 30 years of industry experience in medical technology, including two decades in international senior management positions. Since 2008 he has been president of the Sorin Group’s Cardiopulmonary and Intercontinental business, with full global responsibility from R&D to sales. From 2005-2007, Mr. Darnaud was a consultant to executive search firm Spencer Stuart, where he established a presence for the firm in the medical technology sector in Europe. From 1998-2005, Mr. Darnaud was president of Boston Scientific’s European business, with full P/L responsibility across eight divisions, including interventional cardiology. Additionally, he was chairman of Eucomed (European Medical Device Industry Association) in 2004/2005.

Mr. Darnaud will succeed Brian Kerr of Scottish Equity Partners (SEP), who has accepted to resign from his position as a director to allow for the co-optation of Mr. Darnaud. The board has accepted to nominate SEP, as represented by Mr. Kerr who wishes to maintain a role at STENTYS, as an observer of the board for at least one year.

STENTYS recently raised $31.9 million (€22.7 million) in an IPO on the NYSE Euronext Paris Stock Exchange; the proceeds are being used to commercialize its innovative stents for treating acute myocardial infarction (AMI) in Europe and to obtain regulatory approvals for their commercialization in the U.S.

About STENTYS

Based in Princeton, N.J., and Paris, Stentys has developed a new generation of stents to treat acute myocardial infarction (AMI). Founded by Jacques Séguin, M.D., Ph.D., (also founder of CoreValve, which was acquired by Medtronic) and Gonzague Issenmann, Stentys received the CE mark for its flagship products in 2010. Its self-apposing stents adapt to the anatomic changes of the arteries in the post-infarction phase and thus prevent the malapposition problems associated with conventional stents. Stentys has commenced its marketing activities in several European countries.
