First step towards Initial Public Offering on the Paris NYSE Euronext market

STENTYS files its « Document de Base » with the French Autorité des marchés financiers

STENTYS, a medical technology company which has developed a new generation of innovative stents to treat Acute Myocardial Infarction (AMI), announces the filing of its "Document de Base" by the Autorité des marchés financiers (AMF), the French market regulator, under registration n° I.-10- 067 dated 09th September 2010. This is the first step towards the Initial Public Offering of its shares on the Paris NYSE Euronext market.

Founded in 2006, by Professor Jacques Séguin and Gonzague Issenmann, STENTYS is a medical technology company that offers innovative solutions for the treatment of complex coronary diseases. STENTYS offers a new generation of stents that adapt exactly to the changes in diameter of the coronary arteries during the post-myocardial infarction phase.

The STENTYS stent maintains constant apposition to the vessel wall, a safer solution compared to conventional stents

This new generation of stent offers a safer treatment option for patients. It has been introduced in response to cardiologists' demands for improved stent solutions for AMI, a major cardiovascular pathology which is widespread across western countries.

STENTYS has already led regulatory studies and proved its products efficiency. They have received the CE, allowing sales in the European Union.

The filing of the "Document de Base" is the first step towards an initial public offering of shares by STENTYS which is expected to take place shortly, subject to market conditions after approval of the offer prospectus by the AMF.

STENTYS' "Document de Base" will soon be available on demand and free of charge from STENTYS, 25 rue de Choiseul – 75002 PARIS, and on the websites of STENTYS, www.stentys.com and of the AMF (www.amf-france.org).

The attention of investors is drawn to Section 4 "Risk Factors" of the "Document de Base" registered with the AMF and in particular the specific risks related to the Company's two licensing deals.
