

STENTYS Expands Marketing of the Xposition S Self-Apposing Stent to Mexico

PARIS – August 29, 2018 – 6.15 pm CEST – STENTYS (FR0010949404 – STNT), a French group specialized in medical technologies for interventional cardiology commercializing the Xposition S self-apposing coronary stent today announced the launch of commercial activities in Mexico through a partnership with Levbeth Medical, a company specialized in the distribution of medical equipment for endovascular procedures.

Earlier this month, Dr Neisser Morales and Dr Mizraym Rojas placed the first Xposition S Sirolimus Eluting Self-Apposing stent in Mexico at the ISSSTE LOPEZ MATEOS hospital in Mexico City, with support from Dr Omar Santaera, Sanatorium Las Lomas in Buenos Aires (Argentina) and from Levbeth Medical. This procedure initiates the launch of the self-apposing technology on the Mexican coronary stent market, estimated at approximately \$47m* annually. This latest step in the global expansion strategy of STENTYS is a significant addition to its commercial presence on the Latin American coronary stent market, which is estimated to be worth over \$200 million*.

STENTYS intends to extend the commercialization of the Xposition S stents range to other countries, leveraging the distribution network of the recently acquired MINVASYS company.

Christophe Lottin, Chief Executive Officer of STENTYS, comments: *“The marketing of STENTYS Xposition S on the growing market of Mexico further stimulates our commercial activity in this region of the world where MINVASYS is also present. We look forward to developing our partnership with Levbeth Medical and this first case demonstrates both their involvement and know-how.”*

About STENTYS

The STENTYS group develops and markets minimally-invasive cardiovascular solutions for the needs of interventional cardiology. Its extensive range of innovative products, including drug-eluting stents, coronary and drug-eluting balloons as well as cardiovascular accessories, is marketed in over 60 countries. Thanks to its flagship product, Xposition S, the self-apposing stent that adapts to vessels with variable diameters and enables the treatment of complex arterial disorders, and to its portfolio of balloons and accessories, STENTYS covers all coronary indications.
